

PRODUCT SHEET

QuiPower Storage - Lithium

QuiPower Storage - Lithium is an energy storage with a compact design that fits residential and commercial properties. The battery technology is manufactured by SofarSolar and is based on long-life lithium iron phosphate. The energy storage is modular for easy installation and is supplied with a built-in control unit (BMS) for continuous analysis and management of the energy storage well-being. The energy storage can be used to optimize a property's energy usage or as backup power supply in case of a power outage (in combination with QuiPower Off-Grid).

The energy storage is part of Enequi's QuiPower platform and is sold together with QuiPower Core and QuiPower Inverter.

Key features

- Long-life energy storage
- Supports soft startup
- Simple stack installation, time and cost saving
- Compatible with the QuiPower platform

Data Sheet

The QuiPower platform

Designed to create energy comfort in properties. Whether you need intelligent energy storage, dynamic car charging, automated lighting control or backup power during power outages, QuiPower helps you make your property more energy efficient. Daytime. Nighttime. Anytime.

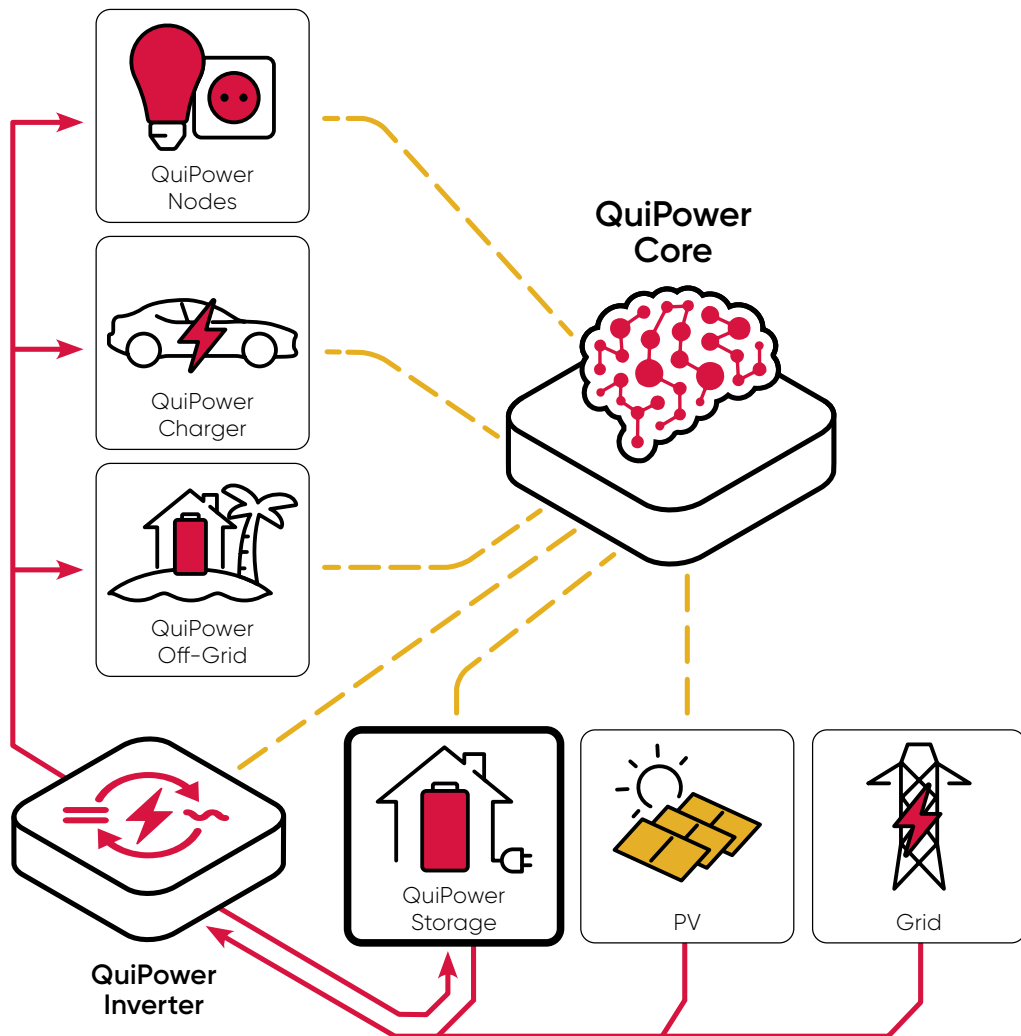

ENERGY TRANSFORMATION IS HERE. IT'S TIME TO TAKE CHARGE.
